

# FACTS

Founded in 1985, Sensis Corporation provides innovative solutions for air traffic control, airline and airport automation, air defense and personnel security. The company serves a global client base with technology deployed in more than 35 countries across six continents. Additionally, Sensis Corporation continually strives to leverage our existing product and technology base – and pioneer product concepts – into new markets.

**Core Purpose:** To provide distinctively elegant, innovative technical solutions in the service of humanity.

## Sensis is comprised of three business areas:

**Air Traffic Systems** – Air Traffic Systems (ATS) provides surveillance and information technology for the aviation industry, supporting air navigation service providers, airports and airlines.

**Defense & Security Systems** – Defense & Security Systems (D&SS) provides protection, safety and security to the world’s defense organizations through radar subsystems and upgrades; ground based radar; performance and optimization tools; and counter terrorism and special protection systems.

**Advanced Development** – Leveraging our core competencies, Advanced Development (AD) works in conjunction with our ATS and D&SS divisions to develop innovative, real-world solutions for today and new business for tomorrow.
